IE CRM + AI System

Where We're At & Where We're Going

Prepared March 2026

Mudge Family — Business Strategy Briefing

🏗️

Part 1: The CRM

🤖

Part 2: The AI System

💰

Part 3: The Money Case

Part 1: The CRM — What's Built

A custom CRM built from scratch for IE commercial real estate

We didn't buy Salesforce or some generic software. We built a CRM designed specifically for how **we** do commercial real estate in the Inland Empire. It's live, it's fast, and it's accessible from anywhere.

✅ Properties

All properties — addresses, sizes, pricing, owners, parking, stories

✅ Contacts

Everyone we work with — names, phones, emails, linked to companies

✅ Companies

LLCs, corporations, property firms — linked to contacts and properties

✅ Deals

Track every deal first conversation to close — commission formulas built in

✅ Comps

Lease and sale comps with all IE industrial fields that matter

✅ Interactions

Log every call, meeting, email — full history tied to contacts and deals

✅ Campaigns

Email outreach campaigns — track who got what and their response

✅ AI Chat Built In

Claude lives inside the CRM — ask questions, run lookups, get instant answers

💡 Smart Features Already Working

Spreadsheet editing — Click any cell, edit right there. Sort, filter, search. **Linked records** — Click a contact → see their company, properties, deals, all connected. **Data import** — Pull data from Excel, CSV, PDFs, even photos. **Cloud hosted** — Accessible anywhere.

CRM — What's Still Left to Build

The foundation is done — these connect the AI and go mobile

🔨 Agent Dashboard

Live view of what our AI agents are doing — what they found, what needs review

🔨 Approval Queue

Review AI findings before they touch our real data — quality control layer

🔨 Team Messaging

Built-in chat for David, Dad, Sarah, and Houston (our AI team member)

🔨 iOS App

Mobile CRM + messaging — check deals and get alerts from your phone

🔨 Email Sending

AI drafts emails, we approve, they send automatically

🔨 AI Connections

Backend plumbing that lets the AI agents read from and write to the CRM

📌 Bottom Line on the CRM

The core CRM is **solid and working** — 8 sections, smart editing, AI chat, data import. What's left is connecting the AI and going mobile.

Part 2: The AI System — How It Works

Think of it like hiring 4 employees who work 24/7 and cost almost nothing

The hardware is already purchased — **Mac Mini arrives next week**, **Mac Studio arrives early June**. Here's how the AI team is organized — three tiers, like a company:

🧠 How the AI Team is Organized

TIER 1 — THE STRATEGIC BRAIN

🧠 Houston (Claude)

Chief of Staff • Reviews everything • Morning briefings • Recommends opportunities • Improves the system weekly

⬇️ reviews & approves ⬇️

TIER 2 — QUALITY CONTROL

💬 ChatGPT

Checks the agents' work every 10 minutes

✨ Gemini

Second pair of eyes for validation

⬇️ validates before anything touches CRM ⬇️

TIER 3 — THE 24/7 WORKFORCE (Runs on Our Hardware)

🔍 The Researcher

Scans the internet 24/7 — news, expansions, hiring signals, lease expirations

Finds the opportunities

🔎 The Enricher

Finds the real person behind an LLC, verifies emails, phones, addresses

Verifies the contacts

✉️ The Matcher

Matches market reports to our contacts, drafts personalized outreach

Creates the outreach

📋 The Logger

Tracks everything, spots when multiple signals point at the same company

Keeps the records

🖥️ **Mac Mini (48GB) — Arriving Next Week**

🖥️ **Mac Studio (128GB) — Arriving June**

🔒 How Data Flows — The Safety System

Nothing touches our CRM until we approve it

1 **AI Agents Scan the World 24/7**

CRE news • Public records • Job postings • Social media • White Pages • County filings

↓

2 **Everything Goes to the Sandbox First**

A "review inbox" — contacts, signals, outreach drafts all wait here. **Nothing goes live until we say so.**

↓

3 **Quality Control Reviews It**

ChatGPT + Gemini check every 10 minutes: "Is this accurate? Is this useful?" Bad data → rejected.

↓

4 **Houston Reviews & Recommends**

Our Chief of Staff reviews the best signals, spots patterns, and recommends what to act on.

↓

5 **David Reviews & Approves**

Quick approve/reject via Telegram from his phone. Takes 2 minutes from bed.

↓

6 **Clean Data Enters the IE CRM ✅**

Only approved, verified data enters our real database. Quality guaranteed.

🔒 **KEY SAFETY RULE: The AI can never write directly to our CRM. Humans always approve first.**

💬 How We Communicate With the AI

Two channels — one for the team, one for David's operations

🧠 Houston (Claude) — One Brain, Two Channels

💬 CRM Messaging App

The whole team sees this

👤 David 👤 Dad 👤 Sarah 🤖 Houston

What Houston posts here:

- 📊 Morning team briefing
- 🔥 "XYZ Corp is expanding — call them"
- 📧 "5 outreach emails ready to review"
- 📈 Weekly market summary
- 🎯 "3 signals pointing at this company"

❌ **No technical alerts or system status**

Houston's personality: Professional but warm. A smart team member, not a robot. Max 3-4 posts/day.

📱 Telegram (Private)

Only David sees this

👤 **David only — private operations channel**

What Houston posts here:

- ⚙️ System status — "All 4 agents running"
- ✅ "5 contacts ready — approve?" → tap Yes
- ⚠️ "Rate limit hit, will resume midnight"
- 💡 "Should I add a filter for dissolved LLCs?"
- 📋 Full ops morning briefing + system health

✅ **Quick commands: /approve /status /health**

David's command center: Approve contacts in 30 seconds from phone. Full control without opening the CRM.

☀️ A Typical Day With the System Running

🌙 Overnight

AI Agents Work While We Sleep

Researcher scans 200+ sources. Enricher verifies 40-50 contacts. Matcher drafts outreach. Logger tracks everything and spots patterns.

☀️ 6:30 AM

Houston Sends the Morning Briefing

Team chat: "12 new contacts verified, 2 companies with expansion signals." **David's Telegram:** Full ops report + "Pacific West has 3 signals. Outreach? (yes/no)"

📱 6:35 AM

David Approves From His Phone (Still in Bed)

Opens Telegram. Taps "Yes" to outreach. Taps "/approve_all_high" for 8 contacts. Done in 2 minutes. Makes coffee.

☕ 8:00 AM

The Team Starts Their Day With Intel Ready

Dad opens the CRM. Houston's briefing is there: "2 hot leads, 5 emails queued." No scrambling — opportunities found while everyone slept.

🏢 All Day

AI Keeps Working in the Background

While the team makes calls and shows properties, the AI keeps scanning. If something urgent comes up, Houston alerts everyone immediately.

📅 Weekly

The System Gets Smarter Every Week

Houston reviews what worked, tunes agents. After a month it's better. After 6 months it's like a veteran analyst who knows our market.

Part 3: The Money Opportunity

Why this translates to more deals and more dollars

❌ Today (Manual)

- 2-3 hours/day on contact research
- Market reports sit in email unread
- Hear about company moves weeks late
- Forget to follow up with quiet contacts
- Lease expirations catch us off guard
- Submarkets trend before we notice

✅ With AI System

- AI researches 24/7 — reviewed in 15 min
- Reports read instantly, matched same-day
- Signals caught day-of — days ahead
- AI flags dormant contacts in hot markets
- Expirations tracked months in advance
- Emerging trends caught before anyone else

⚡

Speed to Market

First call wins in CRE. We find signals days before the competition.

📈

Volume Without Headcount

Research output of a 4-person team — without the salaries.

🌙

Never Sleeps

Monitors 24/7, 365 days. No weekends, no sick days.

🧠

Gets Smarter Over Time

Self-improving. After 6 months, like a veteran analyst.

💳 The Investment

What it costs vs. what it replaces

🖥️ Hardware (Already Purchased)

Mac Mini M4 Pro (48GB)

Arriving next week

✅ **Purchased — paid cash**

Mac Studio M4 Max (128GB)

Arriving early June

✅ **Purchased — Apple 0% APR plan**

💳 Monthly Software Costs

Service	Role	Cost
Claude (Max Plan)	Houston's strategic brain	**$200/mo**
ChatGPT Pro	Quality control layer	**$20–$100/mo**
Google Gemini	Quality control layer	**$20–$100/mo**
Total Monthly		**~$240–$400/mo**

HIRING HUMANS

$200K+

per year

3-4 research assistants
Benefits, management, turnover
Works 9-5, weekdays only

VS

OUR AI SYSTEM

~$4K

per year (software only)

4 AI agents + Houston
No benefits, no management
Works 24/7, 365 days/year

📅 Timeline — What Happens When

✅ NOW	**CRM is live with all core features** AI system designed. Hardware purchased and on the way.
NEXT WEEK	**Mac Mini arrives — first AI agent goes live** Enricher starts verifying contacts 24/7. David reviews via Telegram.
WEEK 2-3	**Researcher + Logger come online** 24/7 internet scanning. Daily logs. Quality control active.
MONTH 1	**All 4 agents running — Houston starts daily briefings** Morning briefings, approval queue, team intelligence. Full system live.
MONTH 2	**Self-improvement kicks in — system gets smarter weekly** Houston tunes agents. Outreach matching goes live.
JUNE	**Mac Studio arrives — bigger models, faster processing** Studio handles precision, Mini handles volume. Team messaging live in CRM.
6 MONTHS	**Genuine competitive weapon** 6 months of compounding intelligence. Every week harder for competitors to catch up.

THE COMPETITIVE MOAT

Nobody in IE Commercial Real Estate is Doing This

The big national firms use generic software everyone has — Salesforce, CoStar.

We built something custom for **our market, our contacts, our workflows.**

Every month this runs, our data gets better, our response time gets faster, and the gap between us and competitors **gets wider and wider.**

The Bottom Line

Custom CRM built for how we do business in the IE.
AI system working 24/7 finding opportunities, verifying contacts, drafting outreach.

~$300/month vs. $200K+/year in salaries

Hardware already purchased • Software costs only

This isn't a tool. It's a team member that never sleeps.

And it gets smarter every single week.
